

2. Auto bending machine COMBO V20Y has two Delta servo motors. It has only plane cutter to process flat materials(stainless steel and aluminum).

Feeding system	Double ball screw with clamps
Slotting system	Plane cutter and milling wheel cutter
Bending Method	Double-bends alternate bending
Material	Stainless Steel, Galvanized Sheet, Aluminum Sheet and Aluminum profile, etc.
Material width	Plane cutter: 20~130/200mm, Milling wheel cutter: 20~100/180mm
Material Thickness	0.4~1.5mm
Min. Bending Angle	R6
Packing	Wooden box 400kg 2.2CBM

Two Delta servo motors. Same feeding, slotting and bending system with COMBO V13S.	 
External computer connection button, more convenient to operate.	 
Air blowing and cooling function to extend the service life of the cutter.	 
High strength alloy cutters, each knife has 8 angles, no need to sharpen, greatly improve the working life (one knife, cutting SS, can cut about 20000 times). Milling wheel cutter (Life time).
